## Core Competencies

Oasis Mobile provides an all-in-one mobile command solution for field operations; a fully-equipped vehicle with the added benefit of sanitation solutions. Built for local, state and federal agencies, Oasis Mobile clients can rapidly deploy vehicles when demand surges, outfit them with custom features, and pair them with an app for secure, discreet access. Oasis Mobile vehicles offer:

- Robust, secure communications, and remote operation connectivity: multi-network communications (5G, LTE, satellite, and mesh Wi-Fi) for mission-critical logistics and coordination.
- Tactical edge computing with ruggedized edge servers and AI-driven processing capabilities for real-time analytics, application hosting, and situational awareness.
- Integrated drone launch platform with live HD video feeds, automated patrol modes, and advanced sensor payloads to deliver aerial coverage.
- High-output solar panels, lithium battery systems, and smart power management support off-grid operations reducing reliance on generators and fuel.
- Touchless faucets, flush systems, automated cleaning features, and air purification, designed for a consistently clean and comfortable user experience.

## Company Data

SAM Registration: Active

UEI: DUPEWLNZSFL5

CAGE Code: 13MD1

EIN: 99-3726331

NAICS: 532120, 336110,

336211, 532490, 561210,

562991 PSC: W023, W085

Accepting Credit Cards: Yes

Virginia SWaM Certified:

## Differentiators

- **All-in-one Capability:** Unified sanitation, connectivity, and command functions in one deployable asset.
- **Customizable Fleet:** Supports surge operations with custom configurations for every mission
- **Rapid Response Mobility:** Built for fast deployment and redeployment as operations shift.
- **Off-Grid Performance:** Functions independently in remote or compromised environments.

## Past Performance

Oasis Mobile's founder brings more than 40 years of experience building and operating companies supporting government contracting and compliance-driven service delivery. The Oasis Mobile team contributes more than 100 years of combined leadership and technical experience in secure computing, always-on connectivity, and field deployment.
